1- Headings

Heading 1

Heading 2

Heading 3

2 - Block of words

This is a normal text in Markdown

> This is a block of special text

To make an special text or distinct block, you have to use ">" sign before typing the line!

> it's the 2nd line

huh! you have to press "enter" two times to put the sentence on the 2nd line 😃

3 - Line breaks

You can also use the full stop sign and the reverse "" then press enter to separate the lines-.
This is the 2nd example!

4 - Combining two things

Block of words and headings

> ## Heading 2

5 - Face of texts

Bold

Italic

Bold & Italic

or you can use "underscore"

Bold

Italic

6 - Bullet points/ Lists

Type "-" and space for making bullets, for example -

- Fruits
- Vegetables
- Beans
- Rice

Press "tab" and for making sub-bullets, for example -

- Fruits
- Vegetables
- Beans
- Rice
    - Per boiled rice
    - Hard rice
- Legumes
- Lentins

7 - Numbering of lists

1. Pens
2. Pencils
3. Books
4. Socks
    - 4a. reds
    - 4b. blues
5. Tables
6. Tomtoms

Then, use "*" or "#" for numbering , for example-

- Pool
- Swiming suits

8 - Page/Line breaks

You can use '-' or '_' or '*' 3 times to make a line in between two sentences!

This page 1.

This is page 2.

9 - Links & Hyperlinks

type '<>' to your desired website link into your file, i.e,- https://www.youtube.com/watch?v=qJqAXjz-Rh4&list=PL9XvIvvVL50HVsu-Ao8NBr0UJSO8O6lBI&index=24

☐ for 'featuring sentence' and put the link after that into a 1st bracket ( ), for example-

click here to see the playlist!

Another way to make this happen, is like this- just make one word for the link, see left for the code used for it 😉

The whole course is here!

10 - Images & Figures with link

If you want add image link-then add '!' before the ['xyz' name] (file name with it's extension) and press enter...voila! your image is here!! but your image file should on the same local directory.

If you want add an online image file, then you have to copy the image link to paste in your coding file

🖼️codanics

11 - Adding codes or a code block

Adding a back tick sign will do the trick! for example-

> print ("Hello, Sam")

this looks normal, right?

> but if add a back tick before and after the whole code, then it will change the color!

```
print ("Hello, Sam")
```

> To make a block of codes add 3 ``` sign, i.e-

```

```

> you can put your whole code inside this black block! such as-

```
    y= c+d
    z= x*y
    print (z)
```

> You can also use specific language like R or Python or HTML in this type blocks, i,e.-

```
  x= a+b
  y= c+d
  z= x*y
print(z)
```

```
  x= a+b
  y= c+d
  z= x*y
print(z)
```

> Such type of coding will also show the change in color! interesting right?

12 - Adding tables

> add '|' and dashes to make rows and columns, for example-

item	number	size
pen	11	1.5
pencil	5	0.05
straw	15	1.05

> To align the table, add ':' after and before the dashes-for middle alignment --

item	number	size
pen	11	1.5
pencil	5	0.05
straw	15	1.05

13 - Contents

> ☐ and (#) to make a content list for your file or page! After ading #..the markdown extension will help you choose from all the hashtags you used in the whole document or file, i.e.-

1- Headings

2- Contents

3- Tables

4- Extensions

14 - Installing extensions

Sample text

> If you select or block the 'text sample' and right click and use 'toggle bold' , it format your sample text as bold 😃 or else you can also use shortcut keys !

Sample text

> thus, you should try all the fun commands like -

'Toggle image'

'Toggle hyperlink'

'Add tables'
